Solution Overview

We propose three distinct tiers of digital transformation for **Vikas Marketing**, ranging from robust web-based portals to a fully integrated Enterprise Mobile Solution.

Web Solutions

Requirements 1 & 2 are high-performance website-based platforms optimized for browser use by admin and salesmen.

Mobile App Tier

Requirement 3 features a dedicated Android/iOS mobile interface with native geolocation tracking for salesmen.

B2B Connectivity

Seamless notification system ensuring that every order taken in the field is instantly visible to the warehouse and back-office.

Data Intelligence

Deep analytics and dashboard views to track performance, stock levels, and customer buying patterns.

Core Objectives

- **Eliminate Paperwork:** Salesmen can submit orders digitally with zero delay, removing all manual data entry errors.
- **Inventory Visibility:** Real-time "In-Stock/Out-of-Stock" alerts for salesmen to ensure reliable delivery promises.
- **Automated Task Management:** Every order taken converts into a dynamic **Admin TODO Checklist** for instant verification, packing, and dispatch tracking.
- **Sales Performance Analytics:** Track top salesmen, trending products, and high-value regions via an automated dashboard.
- **Geographic Insights:** (Req 3) Leverage geotagging to visualize sales presence and territory coverage on an interactive map.

Technical Plans

We are pitching three primary models designed to fit your current needs and future expansion.

FEATURE MATRIX	BASIC (WEB)	FLEXIBLE (WEB)	ENTERPRISE (APP)
Admin & Salesman Login	✓	✓	✓
Real-time Order Generation	✓	✓	✓
